FULL STACK SOFTWARE ENGINEER INTERN (REMOTE)

I am an active member of the developer team at Thinktum. I participate in sprint planning, daily stand-ups, sprint reviews and sprint retrospectives. I am assigned my own tickets which may involve front-end and/or back-end tasks. I have learned to break things locally, debug and ask questions. I have gained experience with pair programming, Typescript, React, Node.js, HTML, CSS, Git, GitLab, MongoDB, Jira, Miro, Docker and Visual Studio.

Other Jobs and Lessons Learned

I've worked a lot of different jobs over the years and I have learned something from each and every one of them.

- Merchandiser (Coca-Cola - Kitchener, ON) - even angry customers deserve to be treated with kindness. You can turn around a situation if you provide good customer service.
- Cook (Baldface Lodge - Nelson, BC) - you are not above any task. Whatever the task is, do it to your best ability. Consistency from the top down leads to an unrivalled guest experience.
- Tree Planter (Blue Collar Silviculture - Quesnel, BC) - consistency and repetition lead to efficiency. The more you do something the better you get at it and the more efficient you become.
- Cook (Fable Kitchen - Vancouver, BC) - communication between team members is key. Everyone has their own tasks and they may not know you need help until you ask for it.
- Snowboard Instructor (Cypress Mountain - Vancouver, BC) - when you teach someone a skill, it makes you better at that skill too. Breaking things down to basics is helpful for all skill levels.
- Video Editor (ADVIDEO - Kitchener, ON) - check your ego at the door. Creativity is collaborative but the end product ultimately belongs to the client. Take constructive criticism and work with the client to make something they love.

Extra Curriculars

- GOOGLE DEVELOPER STUDENT CLUB
- 10-DAY VIPASSANA SILENT MEDITATION RETREAT (GANGTOK, SIKKIM, INDIA IN 2018)
- TIME MAGAZINE PERSON OF THE YEAR 2006
